

Case Studies: Beneficial Use of Sediments - Classification Codes

The case studies on these pages are classified after function and technique (see the lists below). These along with the year of project initiation and the country are included the unique classification code. E.g.

Classification code example: R1A_1985_DE

Where

- R1 indicates Function: Raw Material
- A indicates Technique: On Land Natural or enhanced treatment
- 1985 indicates the year of project initiation and
- DE indicates the country

Function: Five functions are distinguished

- Raw Material: R1
- Remediation: R2
- Reclamation: R3
- Restoration: R4
- Resiliency: R5

Technique: Four techniques are distinguished

- On Land Natural or enhanced treatment: A
- In Water Reallocation at final location: B
- In Water Reallocation at strategic location: C
- In Water Enhanced Trapping: D
