A template (WODCON XXII example template for authors.doc) containing the proper formatting is attached, please refer to Attachment 2.

4.5 Equations, Symbols, and Units

All symbols must be defined in the text immediately following the symbols first use. If extensive use of symbols is necessary, then the symbols should be defined in a nomenclature section that follows the conclusions. The International System of Units (SI) must be used. If units other than SI units are included, they should be given in parenthesis after the relevant SI unit. For example, the pipe diameter is 0.61 m (24 in). Equations should be indented and successively numbered (in parenthesis) flush with the right-hand margin (see example below). (Tabs are already set in the sample template.)

$$y = a + b + cx^2 \tag{1}$$

4.6 References

References in the text should be given as Smith (2011), (Smith 2011) or (Jones et al. 2014). References should be listed **alphabetically** in the References section at the end of the paper. References to conference papers or proceedings should include the name of the organizers. References to articles published in journals should also include the name of the journal, the number of the issue and page numbers (see example below). References to publications in a foreign language should give all details in the original language followed by a translation of the title. The list of references is to be single spaced with a line space separating each reference as shown in the example below.
